ABOUT THE COURSE

Sea transportation is a vital means of transport for the prosperity of a country. It has an impact on the rate of development. It is the most optimal cost efficient means of transporting a large number of goods and creates employment opportunity in other dependant industries like shipbuilding, ship breaking, ship repairing, maritime training etc. It plays a huge role in increasing trade.

Sea transportation services in India have made tremendous progress over the years and the scenario for Sea transport has changed after liberalization. It became very competitive be it for cargo or for mobilizing resources. Policy changes like moderation of the Cabotage law and cargo reservation policy meant International ships decking at Indian ports did not require a license.

Also the volume of cargo handled and container traffic in the major ports has increased from 152.6 million tons in 1990-91 to 519.1 million tons in 2007-08 in India maritime transport. (Source: <http://www.tradechakra.com/indian-economy/infrastructure/maritime-transport.html>)

Consequently, International Course titled Management Course on "Sea Transportation and Logistics" is designed to support the officers responsible to upgrade the sea transportation and logistics and make it at par with the international standards.
